

New 'Boiler Plus' regulation effective April 2018

From 6th April 2018, homeowners are required to comply with Part L of the Building Regulations - commonly known as 'Boiler Plus' when they have a new boiler installed. The regulation introduces new energy efficiency standards for domestic heating, and applies to all households in England.

 TRUSTPILOT

Rating 'Excellent' 9.7/10

MARCH 2018

KEY REQUIREMENTS

- 1** All new gas boilers installed within a domestic property in England must have an ErP energy efficiency of at least 92%.
- 2** All new gas boiler installations must include both time and temperature controls.
- 3** Every new gas combination boiler must be installed with at least one additional energy efficiency measure from the following:
 - A passive flue heat recovery device
 - A smart control with automation and optimisation functions
 - Load compensation
 - Weather compensation

This regulation does not apply to new build properties.

The ATAG boiler range

IS THE MOST ADVANCED AND EFFICIENT IN EUROPE

AND OUR REVOLUTIONARY iC ECONOMISER COMBINATION BOILER IS BUILT TO LAST AND BOILER PLUS COMPLIANT

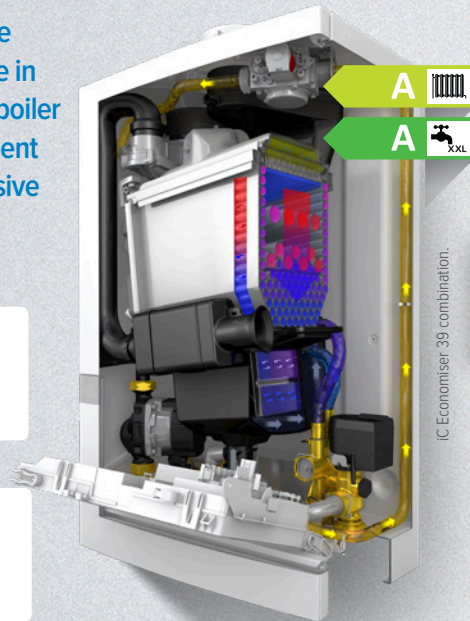

In fact due to its built-in PFGHRD in the same compact casing, which is unique in the UK, the iC Economiser is the only boiler that exceeds this Boiler Plus requirement without having to purchase an expensive add-on.

Built-in Passive Flue Gas Heat Recovery Device (PFGHRD) for maximum efficiency.

Achieves a 98% A+ Energy Related Product rating, reducing the annual gas bill by as much as 15%.¹

Load compensation, a feature of our intelligent wireless ONE programmer.

Built-in weather compensator, saving homeowners up to 12% on their annual gas bills.²

What's more all ATAG boilers come with a 10-year warranty as standard.
